

PRODUCT CATALOG

Race Collection 2025

The catalog offers veterinary products for recovery, performance, and vitality, addressing inflammation, fatigue, growth, and fluid retention in animals.

ABOUT CATALOG

The catalog offers a comprehensive range of veterinary products designed to address the diverse health needs of animals across

various species. It features carefully formulated solutions, including anabolic steroids, corticosteroids, diuretics, energy supplements, and hormonal treatments, aimed at enhancing recovery, improving performance, and promoting vitality. These products are effective in treating conditions such as inflammation, fatigue, growth retardation, hormonal imbalances, and fluid retention. Each product is accompanied by detailed information on its composition, indications, dosage, and storage to ensure safe and effective usage. The catalog is a valuable resource for veterinarians and animal care professionals, providing innovative solutions for managing chronic conditions, supporting recovery from illness or surgery, and boosting productivity in high-performing livestock. With its focus on quality and efficacy, the catalog contributes to sustainable livestock care and improved animal welfare globally.

Anabolic Steroids	04
Hormones	10
Nutritional Supplements	14
Energy Supplements	20

ANABOLIC STEROIDS

Support muscle growth, enhance physical performance, and accelerate recovery in weakened or growth-retarded animals. Ideal for addressing skeletal conditions, improving stamina, and stimulating appetite in livestock and high-performing animals.

ANAIZER-50

Aids recovery, treats skeletal conditions, and supports growth in weakened animals.

BULKAIZER

Enhances recovery, addresses skeletal issues, and boosts growth in livestock.

BULLETAIZER

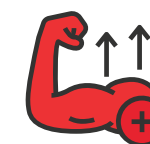

Improves performance, stamina, and recovery in high-performing animals.

QUICKAIZER

Promotes muscle growth, appetite, and long-term strength development.

ANAIZER-50

Anaizer-50 is an anabolic steroid that promotes recovery, treats skeletal conditions, and supports growth in animals experiencing chronic illness or exhaustion.

Composition:

Nandrolone Decanoate: 50 mg

Indications:

- Recovery in weakened or growth-retarded animals.
- Treatment for skeletal conditions like fractures, osteoporosis, and rachitis.
- Support for animals under stress or prolonged corticosteroid treatments.

Dosage:

- General: 1 mg/kg body weight every 3–4 weeks.
- Horses/Cattle: Max 4 ml.
- Foals/Calves/Pigs: Max 2 ml.
- Sheep/Goats: Max 1 ml.
- Cats/Dogs: Max ½ ml.

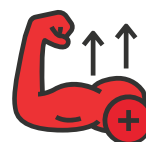

Target Species:

Horses, Cattle, Sheep, Goats, Cats, Dogs, Foals, Calves, Pigs.

Storage:

Store in a dry, dark place between 8°C and 25°C. Keep out of reach of children.

BULKAIZER

Bulkaizer is a potent anabolic steroid that aids recovery, treats skeletal conditions, and boosts growth in animals recovering from chronic illness or physical exhaustion.

Composition:

Nandrolone Decanoate: 300 mg

Indications:

- Enhances recovery in weakened animals.
- Treats skeletal issues like fractures and decalcification.
- Supports animals under physical stress or corticosteroid use.

**Dosage:**

- General: 1 mg/kg body weight every 3–4 weeks.
- Horses/Cattle: Max 1 ml.
- Foals/Calves/Pigs: Max ½ ml.
- Sheep/Goats: Max ¼ ml.
- Cats/Dogs: Max ⅛ ml.

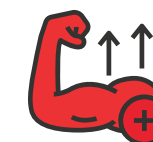

Target Species:

Horses, Cattle, Sheep, Goats, Cats, Dogs, Foals, Calves, Pigs.

Storage:

Store in a dry, dark place between 8°C and 25°C. Keep out of reach of children.

BULLETAIZER

Bulletaizer is an anabolic steroid that boosts stamina, improves performance, and accelerates recovery in debilitated animals.

Composition:

Stanozolol: 50 mg

Indications:

- Improves stamina and physical performance.
- Promotes recovery after surgery or illness.
- Enhances appetite and combats fatigue.

**Dosage:**

- General: 3–5 ml weekly for 4 weeks, followed by 2-week intervals.

Target Species:

Horses, Dogs, Cats.

Storage:

Store in a dry, dark place between 8°C and 25°C. Keep out of reach of children.

QUICKAIZER

Quickaizer is a long-acting anabolic steroid that stimulates appetite, enhances muscle growth, and supports sustained strength development in high-performing animals.

Composition:

Boldenone Undecylenate: 300 mg

Indications:

- Promotes muscle development and appetite stimulation.
- Enhances long-term strength and physical performance.
- Addresses catabolic states in stressed animals.

Dosage:

- Horses: 600–1200 mg administered once every 2–3 weeks.

Target Species:

Horses, Cattle, and other livestock.

Storage:

Store in a dry, dark place between 8°C and 25°C. Keep out of reach of children.

HORMONES

Testosterone-based hormones designed to correct testosterone deficiencies, improve vitality, enhance muscle growth, and boost performance in animals under stress or with hormonal imbalances.

STERONEIZER

Steroneizer is a hormone (androgen) injection specifically formulated to address testosterone deficiencies in animals. It enhances muscle development, supports vitality, and promotes recovery in animals experiencing stress, fatigue, or hormonal imbalances. Ideal for improving physical performance and restoring hormonal balance, it is suitable for livestock and high-performing animals.

SUPERIZER

Superizer is a long-acting anabolic steroid and hormone combination designed to promote muscle growth, improve protein synthesis, and support recovery. It is effective in treating debilitated states, aiding bone and tissue repair, enhancing appetite, and calming nervous or timid animals. Superizer is ideal for animals requiring sustained recovery and physical development.

STERONEIZER

Steroneizer is a hormone (androgen) injection designed to restore testosterone levels in animals, boosting vitality and improving physical performance.

Composition:

Testosterone Enanthate: 250 mg

Indications:

- Corrects testosterone deficiencies in animals.
- Enhances vitality, muscle development, and performance.
- Supports recovery in animals experiencing stress, fatigue, or hormonal imbalances.

Dosage:

- General: 1–4 mg/kg body weight every 2–4 weeks, depending on the condition.

Target Species:

Horses, Cattle, Dogs, and other livestock.

Storage:

Store in a dry, dark place between 8°C and 25°C. Keep out of reach of children.

SUPERIZER

Superizer is a long-acting anabolic steroid and hormone combination designed to promote recovery, improve protein synthesis, and support muscle and bone health.

Composition:

Oestradiol Dipropionate: 2 mg
Nandrolone Decanoate: 100 mg

Hydroxyprogesterone Hexanoate: 100 mg

Indications:

- Aids in bone and tissue repair.
- Enhances recovery from debilitating conditions.
- Promotes muscle development and protein synthesis.

**Dosage:**

- General: 5 ml every 2 weeks, depending on the condition..

Target Species:

Horses, Cattle, Sheep, Goats, and other livestock.

Storage:

Store in a dry, dark place between 8°C and 25°C. Keep out of reach of children.

NUTRITIONAL SUPPLEMENTS

Help manage inflammation, autoimmune disorders, and allergic reactions while supporting immunity and energy metabolism. Combine anti-inflammatory effects with nutritional support to promote overall vitality.

RUNIAZER

Runiazer is a diuretic and corticosteroid combination that helps treat fluid retention (edema) and inflammation caused by conditions like heart, liver, or kidney diseases. It acts on the kidneys to increase urine flow, reducing swelling and excess fluid accumulation, making it effective for managing edema in various animals.

TRIADAXA B15

TRIADAXA B15 is a corticosteroid and nutritional supplement that effectively manages inflammation, autoimmune disorders, and allergic reactions. Enriched with Vitamin B15, it boosts energy metabolism and immunity while promoting recovery and overall vitality in animals.

BXS

BXS is a powerful corticosteroid and nutritional supplement designed to manage severe inflammation, autoimmune conditions, and allergic reactions. Its combination of multiple corticosteroids and Vitamin B12 provides rapid relief from inflammation while supporting energy and recovery in animals.

RUNIAZER

Runiazer is a diuretic and corticosteroid combination designed to eliminate excess fluids and reduce inflammation. It works by acting on the kidneys to increase urine flow, making it ideal for managing edema and related conditions in animals.

Composition:

Torsemide: 10 mg

Dexamethasone: 0.5 mg

Indications:

- Reduces swelling and inflammation.
- Treats fluid retention (edema) caused by congestive heart failure, liver disease, or kidney disease.

Dosage:

- Horses, Cattle: 5–15 ml per animal.
- Calves, Foals, Sheep, Goats, Pigs: 1–2.5 ml per animal.
- Cats, Dogs: 0.1–1 ml per 10 kg body weight.

Target Species:

Horses, Cattle, Calves, Foals, Sheep, Goats, Pigs, Cats, Dogs.

Storage:

Store in a dry, dark place between 8°C and 25°C. Keep out of reach of children.

TRIADAXA B15

TRIADAXA B15 is a corticosteroid and nutritional supplement designed to reduce inflammation while providing essential nutritional support. It improves recovery, manages autoimmune conditions, and supports overall vitality in animals.

Composition:

Triamcinolone Acetonide: 2 mg

Dexamethasone: 0.5 mg

Vitamin B15: 0.2 mg

Indications:

- Improves stamina and physical performance.
- Promotes recovery after surgery or illness.
- Enhances appetite and combats fatigue.

Dosage:

- Dogs/Cats: 0.1–0.2 mg/kg every 15 days.
- Horses: 1 mg per joint (for intra-articular use) every 15 days.
- Camels: 2.5 ml daily for 5–6 days.

Target Species:

Horses, Dogs, Cats, and other livestock.

Storage:

Store in a dry, dark place between 8°C and 25°C. Keep out of reach of children.

BXS

BXS is a corticosteroid and nutritional supplement combination designed to treat inflammation, allergic reactions, and autoimmune disorders. It enhances recovery while providing supplemental Vitamin B12 for energy and vitality.

Composition:

Flumethasone: 0.5 mg
Hydrocortisone: 10 mg
Vitamin B12: 0.2 mg

Prednisone: 10 mg
Triamcinolone: 1 mg

Indications:

- Manages severe inflammation and allergic reactions.
- Treats autoimmune conditions and boosts recovery from stress or illness.

**Dosage:**

- Dogs/Cats: 0.1–0.2 mg/kg every 15 days.
- Horses: 1 mg per joint (for intra-articular use) every 15 days.
- Camels: 2.5 ml daily for 5–6 days.

Target Species:

Horses, Cattle, Sheep, Goats, and other livestock.

Storage:

Store in a dry, dark place between 8°C and 25°C. Keep out of reach of children.

ENERGY SUPPLEMENTS

Formulated to enhance energy metabolism, combat fatigue, and improve recovery in animals. These products restore vitality and boost performance, especially for high-performing or convalescent animals.

VITA-ATP

Vita-ATP is an energy supplement designed to boost energy metabolism, promote recovery, and enhance physical performance. It helps animals combat fatigue, regain vitality, and recover from stress or illness by providing essential nutrients for energy production and immune support.

VITA-ATP

TRIADAXA B15 is a corticosteroid and nutritional supplement designed to reduce inflammation while providing essential nutritional support. It improves recovery, manages autoimmune conditions, and supports overall vitality in animals.

Composition:

ATP (Adenosine Triphosphate): 6 mg
Potassium-Aspartate: 10 mg
Sodium-Selenium: 1 mg

Indications:

- Enhances energy metabolism in animals.
- Improves vitality and physical performance.

Vitamin B12: 0.05 mg
Magnesium-Aspartate: 15 mg

Dosage:

- Cattle: 7–10 ml per day.
- Dogs/Cats: 0.5–1 ml per day.
- Sheep/Goats: 2–4 ml per day.
- Poultry: 0.05–0.1 ml per bird.
- Administer daily for 3–4 days

Target Species:

Horses, Cattle, Dogs, Cats, and other livestock.

Storage:

Store in a cool, dry place at room temperature (15–25°C), away from direct sunlight.

PHENYLIZER Race

COMPOSITION OVERVIEW

INGREDIENT	QUANTITY (PER ML)	FUNCTION
PHENYLBUTAZONE	18 G	NON-STEROIDAL ANTI-INFLAMMATORY DRUG NSAID: RELIEVES PAIN AND REDUCES INFLAMMATION.
DEXAMETHASONE	0.035 G	CORTICOSTEROID; FURTHER REDUCES INFLAMMATION AND CAN CONTROL ALLERGIC RESPONSES.
BENZYL ALCOHOL	1 ML	PRESERVATIVE; HELPS MAINTAIN THE STABILITY AND STERILITY OF THE SOLUTION.
DISODIUM EDETATE	0.004 G	CHELATING AGENT; AIDS IN THE PREVENTION OF OXIDATIVE DEGRADATION, THUS ENHANCING THE SHELF-LIFE.
EXCIPIENT: Q.S.P	-	QUALITY FOR THE SOLUTION, ENSURING OPTIMAL DELIVERY AND EFFICACY OF THE ACTIVE INGREDIENTS.

PHENYLIZER Race

- In-Depth Analysis of Advanced Injectable
- Analgesic for Racing Animals

As a crucial element in the world of competitive racing, understanding the significance of health management and pain relief in racing animals cannot be overstated. What separates a great athlete from a good one can often come down to effective medication management, particularly in the pre and post-race environment. This blog will delve deeper into the components, benefits, administration protocols, and more, providing a comprehensive insight into this vital product.

THANK YOU

Thank you for exploring our catalog of veterinary solutions. We are dedicated to providing high-quality products designed to enhance recovery, performance, and overall vitality in animals. Our carefully formulated treatments aim to support veterinarians in addressing diverse health challenges with precision and reliability.

As a trusted partner in veterinary care, we remain committed to advancing animal health and promoting sustainable livestock care. Your trust in our solutions drives us to innovate and deliver products that make a meaningful difference. We look forward to supporting your efforts in ensuring the well-being and productivity of the animals under your care.
